

# Earth-Kind® Roses

Earth-Kind® is a special designation given to select rose cultivars by the Texas AgriLife Extension Service through the Earth-Kind® landscaping program. It is based on the results of extensive research and field trials and is awarded only to those roses demonstrating superior pest tolerance combined with outstanding landscape performance.

Earth-Kind® roses do well in a variety of soil types, ranging from well-drained acid sands to poorly aerated, highly alkaline clays. Once established, these select cultivars also have excellent heat and drought tolerance. The use of Earth-Kind® roses provides the opportunity to enjoy these wonderful flowering plants while limiting the use of pesticides, fertilizers and water. These sustainable practices are excellent examples of how Earth-Kind® landscaping is working to preserve and protect our natural resources and the environment.
